

Guinness World Record Attempt

We have a unique opportunity to help set a New Guinness World Record for the **Largest Photo Mosaic** and will also be helping **Cumming Elementary School PTO earn money at the same time**. PowerfulPixel, Inc. is constructing a photo mosaic nearly 5 acres in size, visible from orbiting satellites, and **will break the current record by over 43 times**.

In order to do that, they will use **1.92 million squares of color** stapled to plywood in the correct order to recreate an amazing photo of the **Discovery Space Shuttle** flying over the **Jupiter Lighthouse** in Jupiter Florida. People from across the United States are being included in the attempt by sponsoring the squares of color and have their name listed on the web site as members of the team. **When the project is complete and certified as a new world record, all sponsors will share in the honor of being a WORLD RECORD HOLDER.**

So how does Cumming Elementary School PTO make money? All we need to do is tell other people about the project and ask them to join in. When the people we tell about the project sponsor a \$12 pixel, Cumming Elementary School PTO will get 25% (3\$) as a referral reward. **The more people we get involved, the more the school can make.**

If a school has **300 students** participating and each student is responsible for only 10 pixels being sponsored, the school will earn **\$9,000** just for telling people about the project. **500 students** doing the same thing will generate **\$15,000** and **1,000 students** will bring in **\$30,000** for the school.

What do you do next? First, go to www.PowerfulPixel.INFO to get additional information and create a free user account for your child. That account will generate a referral number which links your child to Cumming Elementary School PTO's account. **Be sure to include your child's referral number whenever you tell someone about the project** so their referrals can be tracked.

Next, go to the main site, www.PowerfulPixel.com to see the project details as well as the sponsors already on the team. If you sponsored a pixel for your child, they can see their name on the Record List along with the other sponsors

Cut out the little slips below and hand them out to people you know fairly well. Specifically ask them for their support and then ask them to pass it on to their family and friends across the country so they can support the school too.
